

## Wisconsin Department of Natural Resources SWIMS Project Summary

**General Project Information**

**Project ID:** GL00E01312\_sub5  
**Name:** Sheboygan River AOC Verification Monitoring  
**Type:** Great Lakes Restoration Initiative  
**Subtype:** Toxics and Areas of Concern  
**Status:** ACTIVE  
**Start Date:** 04/15/2014  
**End Date:** 09/30/2019  
**Purpose:** The verification efforts we propose are intended to confirm that riparian and aquatic habitat restoration and improvement projects are functioning as expected as well as to document biological improvements in the AOC that have resulted from restoration and remediation projects. There are five broad categories of monitoring efforts included in this proposal 1) aquatic community assessment, 2) riparian wildlife assessment, 3) fish and wildlife consumption advisory assessment, and 4) assessment of other aspects of environmental conditions and the biological community within the AOC.  
**Objective:** The overarching goal of these verification surveys is to confirm that there has been some degree of improvement resulting from the restoration and remediation activities given expected inherent temporal variability and recovery times for various populations of interest.  
**Comments:**  
**Outcome:** Verify progress toward removing BUIs  
**Study Design:** Aquatic Community Assessment  
 Riparian Wildlife Assessment  
 Fish and Wildlife Consumption Advisory Assessment
