

## Wisconsin Department of Natural Resources SWIMS Project Summary

### General Project Information

**Project ID:** Token Creek TMDL  
**Name:** Token Creek TMDL  
**Type:** TMDL/303d Projects  
**Subtype:** Implement TMDL  
**Status:** COMPLETE  
**Start Date:** 07/01/1997  
**End Date:** 07/01/1999  
**Purpose:** Token Creek was approved and implemented in 1999. The Dam was removed and the stream restored.

**Objective:** Wisconsin Department of Natural Resources, working with numerous federal, state and local partners is undertaking a substantial project to restore Token Creek. This watershed project has a number of components, including:

- Removal of a dam;
- Restoration of stream morphology and habitat (with assistance of the Corps of Engineers);
- Managing sediment and other pollutants for agricultural land through the Lake Mendota Priority Lake Project; and
- Managing storm water discharges through the Lake Mendota Priority Lake Project and the storm water discharge permit program.

This Total Maximum Daily Load (TMDL) deals the sedimentation and degraded habitat impairments in segments of Token Creek. Implementation of the above components along with achieving the load allocation presented in this TMDL should restore and maintain the designated uses of Token Creek.

**Comments:**

**Outcome:** For purposes of this TMDL, the most important land uses for the two listed segments are agriculture and urban (residential and transportation). Growth of the City of Sun Prairie is extending into the headwaters of Token Creek and land in transition from agricultural land to urban land is becoming an important land use in the watershed.

The open space is primarily park land at the downstream end of the watershed and much of the other category is downstream of the two listed segments.

**Study Design:**

**QA Measures:**
