

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPT-052
Name: THE NATURE CONSERVANCY: ACQ-Kangaroo Lake Land Acquisition - Michelsen Property
Type: Lakes Grant
Subtype: Lake Protection Grant
Status: COMPLETE
Start Date: 05/24/1996
End Date: 06/30/1997
Purpose: The Nature Conservancy will acquire approximately 60 acres of land situated along the west side of the north end of Kangaroo Lake 1) to create a significant buffer for the large undisturbed wetland/shallow marl lake system, 2) to protect the north end of the lake from large scale development, and 3) to protect the property's dolomite plateau which is a probable recharge site of the shallow aquifer that feeds the lake through springs near shore and in Peil Creek. Approximately 12 acres adjacent to County E (Maple Rd.) on the west edge of the property consists of an old field of predominately low herbaceous vegetation. The remainder of the property is forested. Shrubs grow on the lake edge of the shoreline ridge. The acquisition of this property is part of the sponsor's Kangaroo Lake/Peil Creek Complex plan. The primary goals of the property's management are contained in the Kangaroo Lake/Peil Creek Project Management Plan and include 1) to maintain or improve the water quality of Peil Creek and the integrity of the riparian corridor of the creek and the lake shoreline; to protect and restore as necessary, natural hydrologic systems, and 2) to preserve and enhance the site's native plant and animal communities, ensuring that the entire gradient of natural communities represented is protected; to protect the forest areas from further fragmentation or logging.

Objective:
Comments: Grantee is THE NATURE CONSERVANCY
