

## Wisconsin Department of Natural Resources SWIMS Project Summary

### General Project Information

**Project ID:** LPL-895-03  
**Name:** ARCHIBALD LAKE ASSOCIATION: Archibald Lake Septic Evaluation Ph 3  
**Type:** Lakes Grant  
**Subtype:** Large Scale Lake Planning  
**Status:** COMPLETE  
**Start Date:** 04/01/2003  
**End Date:** 06/30/2004  
**Purpose:** This grant is the third phase in a comprehensive study of the lake and its watershed in order to develop a final comprehensive plan and recommendations for preserving the lake's water quality and resources. This third phase of study will include a septic system evaluation of resident systems on the lake, an onsite review of storm water runoff on individual lots and developing further recommendations for goose management based upon a goose census to be done. The applicants consultant will also be comparing more secchi disk data gathered this coming year to past information and developing an updated TSI for water clarity.

The information derived from the septic system evaluation will be coordinated with the information developed in the Phase 2 planning grant to determine potential problem areas around the lake. Recommendations will be made to reduce stormwater impacts on the lake along with developing a map showing environmentally sensitive areas.

The report findings will be presented at the annual Archibald Lake Association meeting and incorporated in an association newsletter.

**Objective:**  
**Comments:** Grantee is ARCHIBALD LAKE ASSOCIATION  
**Outcome:**  
**Study Design:**  
**QA Measures:**
