

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: RP-104-05
Name: MILWAUKEE RIVERKEEPER: Milwaukee Urban Water Trail
Type: River Grant
Subtype: River Planning Grant
Status: COMPLETE
Start Date: 07/01/2004
End Date: 12/31/2005
Purpose: The Friends of Milwaukee's Rivers is proposing to inventory existing access for streams and Lake Michigan for boating, fishing and other forms of riverfront recreation. The goal is to provide an urban water trail and access map, both in paper and electronic format. Public signs and information will be provided for current public access points.

A needs assessment would be created based on the inventory, and recommendations and guidance created for future actions and changes needed in local ordinances to facilitate public access to Milwaukee's rivers and Lake Michigan. An additional goal of this project is to inspire public involvement in natural resource management, protection, and restoration activities along our rivers and lake, and provide a greater "sense of place" to the watershed.

The Milwaukee Urban Water Trail will create educational materials that will be distributed to the public to promote existing river access. The project would include a needs analysis and action plan that would assess local ordinances and make recommendations for improvements.

FMR will publicize the project in newspapers, town meetings, website, quarterly newsletter, conferences, and regional partnership meetings. With this grant there will be a match of \$43,160.00 from WI Coastal Mgt. Program, River Revitalization Council, and WE Energies.
