

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: NKE78
Name: Turtle Creek PWS Plan - Nine Key Element Plan
Type: Water Quality Planning
Subtype: Priority Watershed Plan
Status: COMPLETE
Start Date: 04/01/1984
End Date: 12/31/2002
Purpose: The Turtle Creek Priority Watershed Project plan assesses the nonpoint sources of pollution in the Turtle Creek Watershed and guides the implementation of nonpoint source control measures. These control measures are needed to meet specific water resource objectives for Turtle Creek and its tributaries. The purpose of this project is to develop and document water quality and land use information about the Turtle Creek Watershed so that the specific causes and critical areas contributing to nonpoint source pollution in the watershed can be identified and the most practical means for abating the pollution can be developed.
Objective: The primary objective of the project is to reduce nonpoint source pollution to the surface water and groundwater, and to enhance and protect the water quality of streams in the Turtle Creek Watershed.
