2016 Total Phosphorus Monitoring Report Dorn Creek at North Shore Bay Rd near Westport	<p>Many of Wisconsin's water quality standards require multiple visits to make an impairment decision. Every year, several streams sites are monitored, and the field data collected during each visit is used to flag problem waters. The following year, follow up monitoring is conducted at sites where our data suggests that there might be an impairment, but we do not have the minimum data requirements to make an impairment decisions based on WisCALM guidance.</p>	Ilana Haimes	01/06/2017
