Deer Lake Conservancy Picture	Picture of product commemoration the Johnson Preserve.		05/01/2017	
Deer Lake Conservation Tour Guide	It describes projects completed over more than two decades. Our focus is to gain control of critical lands for the purpose of reducing runoff of nutrients and sediment that flows from agricultural areas to Deer Lake. We have purchased properties and then converted eroding cropland to prairie, restored wetlands, cleaned up old gravel pits and disposal areas, and created sediment basins to hold dirty water and release it slowly.
