

## Wisconsin Department of Natural Resources SWIMS Project Summary

### General Project Information

**Project ID:** ECWRPC Oshkosh SSA Plan  
**Name:** Oshkosh Urban Service Area – EC WQMP  
**Type:** Water Quality Planning  
**Subtype:** Sewer Service Area Plans  
**Status:** ACTIVE  
**Start Date:** 01/01/1980  
**End Date:** 12/31/2099  
**Purpose:** <p>The statewide Areawide Water Quality Management Plan (AWQMP) is a collection of documents that describe the overall condition and resources within a given area. These plans form the foundation for the management of water quality. The AWQMP serves as a platform for subsequent water quality initiatives and activities, including point and nonpoint pollutant plans, monitoring activities, and related environmental resource considerations. One item found under the umbrella of Areawide Water Quality Management Planning is the Sewer Service Area Plan. Sewer Service Area plans are specific to infrastructure development within municipal areas and outline 20-year service areas for public sewers. </p>  
 <p>Sewer Service Area Plans outline 20-year growth boundaries and sensitive areas to protect water quality by proactively addressing the future needs for wastewater collection and treatment in developing areas. This planning helps protect water resources from adverse impacts by facilitin cost-effective and environmentally sound sewerage system planning. Plans identify existing sewerred areas as well as available land suitable for new development. The process also identifies areas not suitable for public sewer including but not limited to environmentally sensitive areas (NR 121.05(l)(g)2.c).</p>  
 <p>Goals to establish service area plans and policies relating to wastewater collection and treatment are best developed in tandem with Comprehensive Planning. Policies framing service area planning decisions include:</p>  
 <p>• Providing cost-effective collection and treatment facilities;<br />  
 • Consideration of current and anticipated development or redevelopment that conforms with Comprehensive Plans;<br />  
 • Providing collection and treatment infrastructure improvement and upgrades accommodating 7-yr design events, and addressing NPDES permitting and EPA guidelines;<br />  
 • Providing collection and treatment facilities that comply with state and federal regulations and protection of sensitive resources such as headwaters, springs and wetlands;<br />  
 • Optimizing Main and CSO treatment plant performance and efficiency;<br />  
 • Optimize industrial pretreatment and pollution prevention strategies;<br />  
 • Interagency cooperation and public involvement.</p>  
 <p>With input from Planning, Engineering, and Wastewater, and WDNR SSA Planning effectuates long-term water quality protection by designating as environmentally sensitive wetlands, shorelands, floodplains, steep slopes, lands with erodible soils, and environmentahy limiting areas within the planning boundary. Additional areas within the City's limits which are guarded from sewerred development include parks, the municipal forest and other valuable recreational areas.</p>  
**Objective:** Located within the Fox Cities in northeast Wisconsin, Oshkosh is strategically located along the western shores of Lake Winnebago. With a population of nearly 67,000 people, the City offers residents the friendliness and strong community spirit of a small town and the amenities of a much larger area. The City encompasses about 17,700 acres and includes a mix of residential, commercial, industrial and recreational land uses. Embracing its past, Oshkosh's unique and distinct character merges the historic architecture of the past with the modern design of today.

2030 Brillion SSA Plan Final Draft	This is the Final Draft of the 2030 Brillion Sewer Service Area Plan update. This documented submitted for certification by the WDNR.	Joe Huffman	01/31/2014	
ECWRPC 2013 Oshkosh SSA Amendment - ECWRPC No. 145	ECWRPC 2013 Approval letter -The Department hereby approves the amendment which removes two parcels of land (169.21 acres) located in the Town of Oshkosh, from the sewer service area, and add two areas (160.93 acres), adjacent to the current sewer service area. All owners of the property removed from the sewer service area were notified. The addition consists of approximately 150 acres of developable vacant land, 12 acres of existing roadways, and less than 1 acre of wetland buffer. The proposed development includes light industrial/commercial parks to serve aviation related businesses	ECWRPC	04/15/2013
