

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPL-1139-07
Name: TOWN OF WASHINGTON: Upper & Lower Ninemile Lake Limnological Baseline Studies & APM Plan
Type: Lakes Grant
Subtype: Large Scale Lake Planning
Status: COMPLETE
Start Date: 10/01/2006
End Date: 12/31/2009
Purpose: The Town of Washington is sponsoring a large scale lake planning grant to study Upper and Lower Ninemile Lakes in Vilas County with a study completion date of June 30, 2008. The Town of Lincoln, Town of Cloverland, and City of Eagle River, are project partners. The project will focus on developing an Aquatic Plant Management (APM) Plan for each lake.

Project activities include:

- 1) Data review, project kick-off meeting and project final meeting
- 2) Develop public questionnaire and prepare educational article
- 3) Point-intercept (PI) survey of aquatic plants with 2 sets of pressed plants from Lower Ninemile Lake
- 4) Aquatic plant community mapping and analysis
- 5) Water quality sampling - secchi, P, Chla, DO, and Temp during survey period
- 6) Watershed and land use analysis
- 7) Develop APM Plans

Project deliverables include:

- 1) Public questionnaire and educational article
- 2) PI data and aquatic plant community and watershed maps
- 3) 2 sets of pressed aquatic plants from Lower Ninemile Lake (one set for lake group and second for Dept)
- 4) Water quality sampling results
- 5) APM Plans

Specific conditions for this project:

- Draft of public questionnaire should be submitted to Lakes Management Coordinator for review before sending to public
- APM Plans need Dept review and approval

WDNR Lakes Management Coordinator will be provided with an electronic (pdf or word) and hard copy of APM Plans, educational article, public questionnaire, data from watershed and land use analysis, data from PI survey, data from water quality sampling, all maps from project, and a set of pressed aquatic plants from Lower Ninemile Lake.

Objective:
Comments: Grantee is TOWN OF WASHINGTON

Title	Description	Author	Published	Comments
Aquatic Plant Management Plan Lower Ninemile Lake Vilas County, Wisconsin	Northern Environmental Technologies completed an aquatic plant survey on Lower Ninemile Lake in summer of 2007, which identified twenty-four aquatic plant species. The most abundant aquatic plants identified during the survey were northern wild rice (<i>Zizania palustris</i>) and bushy pondweed (<i>Najas flexilis</i>), fern or Robbins pondweed (<i>Potamogeton robbinsii</i>), and nitella (<i>Nitella</i> sp.). The Floristic Quality Index (FQI) is an index that uses the aquatic plant community as an indicator of lake health. Lower Ninemile Lake exhibited an FQI value of 29.02, higher than the Wisconsin Northern Ecoregion average (24.3).	Northern Environmental Technologies, Inc.	10/15/2009	
Aquatic Plant Management Plan: Upper Ninemile Lake Vilas County, Wisconsin	Northern Environmental completed an aquatic plant survey on Upper Ninemile Lake in 2007, which identified eighteen aquatic plant species. The most abundant aquatic plants identified during the survey were northern wild rice (<i>Zizania palustris</i>), watershield (<i>Brasenia schreberi</i>) and common bladderwort (<i>Utricularia vulgaris</i>). The Floristic Quality Index (FQI) is an index that uses the aquatic plant community as an indicator of lake health. Upper Ninemile Lake exhibited an FQI of 25.25, higher than the state northern ecoregion average (24.3).	Northern Environmental Technologies, Inc.	10/15/2009
