

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: AEPP55218
Name: RED CEDAR LAKES ASSOCIATION: 2018-19 Red Cedar Lakes CLP PLanning & APM Plan Update
Type: Aquatic Invasives Grant
Subtype: Aquatic Invasives Education
Status: COMPLETE
Start Date: 02/15/2018
End Date: 06/30/2020
Purpose: The Red Cedar Lakes Association is sponsoring a project to conduct AIS monitoring and update the aquatic plant management plan.

Project deliverables include GIS data & maps of areas monitored, aquatic plant survey and bed mapping data and report, AIS and water quality monitoring data in SWIMS, education materials developed, dye study report, and an updated APM plan.

Specific project activities include: 1) Volunteer AIS monitoring; 2) AIS outreach & education; 3) Spring and summer whole lake point intercept plant surveys; 4) CLP bed mapping; 5) Purple loosestrife monitoring; 6) Dye study on north end of Balsam Lake; 7) APM plan update; 8) Lake and tributary water quality monitoring; 9) WAV stream monitoring.

Special Conditions: 1) Sponsor shall contact DNR immediately if a new AIS is found; 2) Water quality, WAV, and AIS monitoring personnel shall be trained and follow DNR approved protocols; 3) Water quality, WAV, and AIS monitoring data shall be entered in SWIMS; 4) Education materials shall be consistent with the Department's statewide education strategy for preventing and controlling AIS; 5) WDNR's 2019s Aquatic Plant Management in Wisconsin guidance shall be followed for point-intercept survey monitoring and aquatic plant management plan development. The NOR Native Plant Protection Strategy shall be integrated into the APM plan.

This scope is intended to summarize the detailed project scope provided in the application and does not supersede those application tasks/deliverables. Data, records, reports, and education materials, including GIS-based maps and digital images, must be submitted to the Department in a format specified by the regional lake coordinator.

2018 Curlyleaf Pondweed Delineation Survey	We conducted a late-spring delineation survey to locate and map areas of curlyleaf pondweed (CLP) throughout the Red Cedar Chain of Lakes around the time of peak CLP abundance. Results from this survey will help to evaluate the effectiveness of past CLP control strategies and guide management decisions over the coming years.	James A. Johnson - Aquatic Ecologist, Freshwater Scientific Services, LLC	06/01/2018	
2018 Red Cedar Lakes PI Survey Data	Data from the PI surveys on the Red Cedar Lakes chain: Balsam, Hemlock, Mud, and Red Cedar Lakes between August 28,2018-September, 7, 2018.	James A. Johnson	09/07/2018	
Aquatic Plant Community of the Red Cedar Lakes: 2018	These surveys were designed to map the extent of curlyleaf pondweed beds and provide detailed, statistical assessments of the aquatic plant communities in Red Cedar Lake,	James A. Johnson - Aquatic Ecologist, Freshwater Scientific Services, LLC	02/08/2019

Balsam Lake, Washburn County 2018 Rhodamine Dye Study Report	<p>Hemlock Lake, Balsam Lake, and Mud Lake (collectively referred to as the "Red Cedar Lakes" hereafter). The information gained from these assessments provides a baseline for evaluating any changes in the plant community over the coming years, and will help to guide responsible vegetation management planning.</p> <p>As a part of the 2018-19 AEPP grant that was submitted a plan for a Rhodamine Dye Study was developed by LEAPS. Calculations were completed that determined that 6.93 lbs of liquid Rhodamine dye would be needed to mimic a comparable chemical treatment application on a 7.6 acre bed of CLP identified in the north end of Balsam Lake in the spring of 2018 (Figure 6, Table 5).</p>	Lake Education and Planning Services	01/01/2019

Dye Study Results - Balsam Lake, Washburn County [Photo]	Image of the dye study results on Balsam Lake until 72 hours after treatment.	Dave Blumer, LEAPS	06/07/2018	
Red Cedar Lakes - Barron County - 2018 AEPP Project Implementation Summary Report	<p>This report discusses aquatic plant management activities completed by the Red Cedar Lakes Association (RCLA) and Lake Education and Planning Services (LEAPS) during the 2018 season associated with the AIS Education, Prevention, and Planning (AEPP) project awarded in early 2018. This project covers waters in four different lakes: Balsam, Mud, Red Cedar, and Hemlock.</p>	Dave Blumer	02/06/2019	
Red Cedar Lakes APM Approval Letter	Approval letter for Red Cedar Lakes APM plan.	Alex Smith	03/03/2020	
Red Cedar Lakes, Barron and Washburn County, 2020-2024 Aquatic Plant Management Plan	<p>The Red Cedar Lakes are located in northwestern Barron County and southeastern Washburn County, northwest Wisconsin in the headwaters region of the Red Cedar River. The Red Cedar Lakes consist of three main stem lakes (Balsam, Red Cedar, and Hemlock) on the Red Cedar River, and Mud Lake, a small spring-fed lake flowing into Balsam Lake. The lakes cover more than 2,600 acres and have nearly 39 miles of shoreline. Bass Lake is a small (19-acre) seepage lake adjacent to the northeast shore of Red Cedar Lake. Bass Lake is listed as being 39-feet deep with an average depth of 13-feet. It primarily consists of a warm water fishery with largemouth bass, northern pike, and panfish.</p>	Dave Blumer	10/01/2019
