

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: SPL39719
Name: DANE COUNTY: Surveys of Lake Waubesa Nearshore Fish Populations
Type: Lakes Grant
Subtype: Small Scale Lake Planning
Status: ACTIVE
Start Date: 02/15/2019
End Date: 12/31/2019
Purpose: Dane County Department of Land and Water Resources is sponsoring a project to assess the nearshore fish of Lake Waubesa as part of the county's 2019s APM planning and implementation with the following goals: a) evaluate the fish species diversity and composition of sensitive species, evaluate factors that may be affecting these fish populations, and educate the public and local governments and recommend any needed actions that will protect the sensitive fish. Project deliverables include raw fish survey data from about 15 sites around the lake, and a report comparing results to previous surveys. Potential environmental factors affecting these fish will be assessed. This scope summarizes the project detail provided in the application and does not negate tasks/deliverables described therein. Data, records, and reports, including GIS-based maps, and digital images, must be submitted to the Department in a format specified by the regional Lake Biologist. If consultant is to provide final report, it is recommended that Grantee provide DNR Lake Coordinator with a draft for comment on report adequacy prior to making final payment to the consultant. DNR to receive both paper and electronic .pdf copies of the final report along with, or prior to submission of grantee's final payment request.

Objective:
Comments: Grantee is DANE COUNTY
