

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: RM-037-08
Name: HARRY & LAURA NOHR CHAPTER OF TROUT UNLIMITE: Blue River Project 2007
Type: River Grant
Subtype: River Protection Grant
Status: COMPLETE
Start Date: 07/01/2007
End Date: 12/31/2008
Purpose: The 2007 Blue River project presents opportunities for a continuing diverse and dynamic protection and management program. The goal of this grant is to implement a streambank restoration project which is part of a larger watershed management effort. Specific objectives include the performance of in-stream restoration of the Blue River to improve trout habitat and improve spawning potential and to work with the landowners, other agencies, and volunteers.

Please note: Final report deliverables help us ensure that the grant has been satisfactorily completed, and that state dollars are being spent wisely. Every deliverable, no matter how minor, must be completed in order to receive full reimbursement for the state share of costs. Ranking questions used to obtain this award, and specific deliverables mentioned in your grant description, constitute final report deliverables. If any deliverable is not adequately provided in the final report, only partial reimbursement, at the department's discretion, will be made. The only exception will be if there is a well-justified and department-approved scope amendment. If you have any question about what a specific ranking question or other deliverable means, please contact your river coordinator BEFORE you sign this agreement.

Objective:

Comments: Grantee is HARRY & LAURA NOHR CHAPTER OF TROUT UNLIMITE
