

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: ACEI24621
Name: THREE LAKES WATERFRONT ASSOCIATION: Long and Virgin Lakes AIS Monitoring and Control - 2021-2023
Type: Aquatic Invasives Grant
Subtype: Aquatic Invasives Control
Status: ACTIVE
Start Date: 03/15/2021
End Date: 12/31/2024
Purpose: Project Scope and Description of Deliverables

TLWA is sponsoring a project to implement approved Eurasian watermilfoil (EWM) control activities from their aquatic plant management plan.

Project activities include:

- 1) EWM control with hand pulling removal and possibly herbicide treatment;
- 2) Early and late season AIS mapping surveys (for EWM);
- 3) Aquatic plant point-intercept surveys (to evaluate larger herbicide treatment if applicable);
- 4) Herbicide concentration monitoring and analysis (if applicable);
- 5) Annual and final AIS strategy assessment reports summarizing EWM management and monitoring during project and future EWM management direction.

Project deliverables include:

- 1) EWM management and associated reporting;
- 2) Data from aquatic plant surveys;
- 3) Herbicide concentration results in SWIMS;
- 4) Annual and final AIS monitoring and control strategy reports.

Specific project conditions:

This scope summarizes the project detail provided in the application and does not negate tasks/deliverables described therein. All data and reports, including GIS-based maps, and digital images, must be submitted to the Department.

DNR is to receive copies of the final report along with, or prior to submission of grantee's final payment request. It is recommended that Grantee provide DNR Lake Coordinator with a draft of the final report for comment on report adequacy prior to making final payment to the consultant.

It is strongly recommended that an annual management strategy meeting be held each winter with DNR to discuss EWM management for the next year before aquatic plant management permit applications are submitted.
