

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: Becky Creek NOR_02_CMP10
Name: Becky Creek, Rusk, 2369600
Type: TMDL/303d Projects
Subtype: Monitor Listed Waters
Status: COMPLETE
Start Date: 07/01/2009
End Date: 06/30/2010
Purpose: The lower reach of Becky Creek is on the 303d list since it is currently a WWFF stream with the potential to be a coldwater stream. Extensive pasturing of the stream over many years on one property is the primary problem. Pasturing and floodwater transport of gravel has obliterated the former stream channel. There is also uncertainty about the natural capability of the lower end of the stream to support a coldwater community. The assessment project will be overseen by Craig Roesler. Assessment will include:
 - establishment of 3-4 reference point to allow photographic documentation of channel re-development 2+ times per year in the impaired channel segment
 - thermistor deployment at 2 sites in the stream above and below the impaired channel segment
 - fish surveys above and below the impaired channel segment
 - a one time summer survey of streamflow and water temperature at multiple points along the stream
 - macroinvertebrate samples above and below the impaired channel segment
Objective: Since Becky Creek is on the 303d list, we need to either restore the lower reach of Becky Creek to a coldwater stream or determine that it does not have the natural ability to achieve this state. Pasturing of the impaired segment has been eliminated but redevelopment of a narrowed channel for low flow conditions is needed. Channel observations over time will indicate if this can be naturally achieved or if additional measures are needed.

Name	Role	Status	Start Date	End Date	Organization	Comments
Roesler, Craig P	COORDINATOR	COMPLETE	07/01/2009	06/30/2010	Wisconsin DNR	

Project Statuses

Date	Reported By	Status	Comments
02/16/2009	Craig Roesler	Proposed	proposed as a project for monitoring -
01/31/2011	Craig Roesler	Progress: 75-100% Complete	Field work now completed. Completion had been delayed because the stream went dry in 2009, and field work had to be extended into 2010. A draft report is complete. Report needs final editing and entry into SWIMS.
02/02/2011	Craig Roesler	Complete	Final Report uploaded into SWIMS
11/22/2013	Lisa Helmuth	Active	Becky Creek is now ready for TMDL Implementation

Actions

Action	Detailed Description	Start	End Date	Status
Monitor or Propose 303(d) Listing	Becky creek was listed as impaired in 1998(e. coli) and 2004 (sediment) but since that time, the stream has been found to meet or exceed expectations and is proposed for delisting in 2012.	07/01/2009	06/30/2010	COMPLETE
