

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPL-1300-09
Name: TURTLE FLAMBEAU FLOWAGE TRADE LAKE PROPERTY: Turtle Flambeau Flowage Water Quality Monitoring
Type: Lakes Grant
Subtype: Large Scale Lake Planning
Status: COMPLETE
Start Date: 04/01/2009
End Date: 06/30/2010
Purpose: The Turtle Flambeau Flowage/Trude Lake Property Owners Association is sponsoring a grant to evaluate the present and historical water-quality or the flowage; to develop a spatial and temporal description of the water-quality throughout the Flowage; and determine if the Flowage water-quality has changed since monitoring began. Information will be used to better understand the flowage water quality and provide background information to aid in the development of the assessment/appraisal report.

Project goals include: 1) Determine the current water quality and trophic status of the Flowage and provide data describing its condition in comparison with historical and existing self-help data; 2) Systematically evaluate the water-quality data being collected as part the WDNR Citizen Monitoring Program; 3) Assemble and summarize existing data to help provide a description of how the water quality in the Flowage has fluctuated; 4) Provide information on initial results and further study recommendations to Association members, TFFTL user groups, and the general public; 5) Develop an assessment/appraisal report outlining additional data collection needs (if justified) and steps for creation of a comprehensive management plan (through a diagnostic feasibility study).

Project deliverables include: 1) an assessment/appraisal report documenting water quality results and priority issues identified by association members (from a separate study); 2) A compilation of aquatic plant species found in the TFFTL and a habitat characterization; 3) An analysis and summary of existing land use; 4) A group of articles highlighting water-quality work will be compiled and made available to the public; 5) evaluation summary of existing vs. historical water quality.

Specific conditions for this Project: The WDNR will be provided electronic and hard copies of all data and or reports/plans generated as a result of this project.

Objective:
Comments: Grantee is TURTLE FLAMBEAU FLOWAGE TRADE LAKE PROPERTY
Outcome:
Study Design:
