

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: GLRI_00E00571-0
Name: Clearing a Path: Revitalizing Lake Michigan's Sturgeon
Type: Great Lakes Restoration Initiative
Subtype: Habitat
Status: ACTIVE
Start Date: 10/01/2010
End Date: 12/31/2099
Purpose: The goal is to revitalize the venerable lake sturgeon of Lake Michigan by reconnecting existing populations with historic spawning and rearing habitat in the Menominee River.
Objective: Reconnecting will occur by providing fish passage up- and downstream around two hydro dams, less than a mile apart. EPA funds would allow for building a fish lift at one dam that will enable sturgeon to eventually pass both dams.
Comments: \$1,500,000
Outcome: Short-term outcome: 50-200 sturgeon passed upstream per year. Long-term: 21 miles of habitat re-opened and sturgeon population increased from 3K to up to 20K adults in 50-100 years.
