

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPL-1443-12
Name: COLUMBIA COUNTY LWCD: Tarrant Lake, API, SPM Plan & Water Chemistry Load Analysis
Type: Lakes Grant
Subtype: Large Scale Lake Planning
Status: COMPLETE
Start Date: 10/01/2011
End Date: 12/31/2013
Purpose: The Columbia County LWCD will inventory the aquatic plant community in Tarrant Lake, Columbia County, and write an aquatic plant management plan following DNR guidance. This process will provide education to the community while inviting their input. A bathymetric map will be created to document lake depths, which have changed due to the recent dredging project. They will also use data already collected to do a water chemistry load analysis and model phosphorus. In addition, in order to provide an Aquatic Plant Management Plan that is complex in scope Columbia County will conduct a shore land health study with GPS photography on the land from the high water mark to the first 30\2019 surrounding the lake. All these efforts will be used to update the comprehensive lake management plan. There will be public meetings, and results will be compiled into a final report which will be posted on the County LWCD website.
