

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: SPL-277-12
Name: FOND DU LAC COUNTY: Lake Winnebago Planning
Type: Lakes Grant
Subtype: Small Scale Lake Planning
Status: COMPLETE
Start Date: 10/01/2011
End Date: 06/30/2012
Purpose: In the last few years, Lake Winnebago has experienced greatly improved water clarity which has resulted in a large increase in aquatic plant density. As a result, lake stakeholders are upset and educational outreach is necessary to help people understand why lake conditions are changing. Fond du Lac County is currently engaged in identifying potential stakeholder groups in preparation for developing a lake management plan. They have also hired a lake coordinator who is developing educational materials and media sites to share information and bring stakeholders together.

Specific deliverable project outcomes are as follows: 1. Creation of a data base for use by stakeholders, 2. Creation of a media site to distribute information, 3. Creation of a Lake Winnebago group comprised of a core group of stakeholders pulled from DNR, ACOE, boaters and other users of the lake, 4. Develop and provide publications and educational resources to stakeholders and the public.
