

## Wisconsin Department of Natural Resources SWIMS Project Summary

### General Project Information

**Project ID:** WCR\_12\_CMP13  
**Name:** La Crosse 303d Lakes Monitoring  
**Type:** Competitive Projects  
**Subtype:** Impaired Water Assessment  
**Status:** ACTIVE  
**Start Date:** 07/01/2012  
**End Date:** 12/31/2012  
**Purpose:** La Crosse proposes to monitor one lake (impoundment) in 2012 that is currently on the 303d list. Data collection will include collecting Total Phosphorus (TP) and Chlorophyll a (Chl a) samples and documenting the vertical dissolved oxygen and temperature profiles. The monitoring activities are proposed for Lake Neshonoc located in La Crosse County. Lake Neshonoc is currently on the 303d waters list for the following impairments: PCBs and mercury in fish tissue and eutrophication from TP and sediment.  
**Objective:** This project supports the impaired waters project category. Monitoring on this existing 303d water will validate and improve the existing listing. Lake Neshonoc (1653500) in La Crosse County is currently on the impaired waters list. Lake sampling and profile data will be collected on three occasions at one site on Lake Neshonoc. Sampling will take place during the 2012 field season following the dates outlined in the WisCALM guidance for lake impairment assessment.  
**Comments:** New project.  
**Outcome:** TP and Chl a samples and vertical dissolved oxygen and temperature profiles will be collected on three occasions at one site on Lake Neshonoc. Lake Neshonoc is lacking recent information.  
**Study Design:**  
**QA Measures:**

### People

Name	Role	Status	Start Date	End Date	Organization	Comments
HAZUGA, MARK J	TEAM_MEMBER	INACTIVE	02/17/2012	12/31/2012	Wisconsin DNR

### Project Statuses

Date	Reported By	Status	Comments
03/16/2012	KURT RASMUSSEN	Proposed	
02/01/2013	KURT RASMUSSEN	Progress: 75-100% Complete	Field work has been completed.
12/23/2014	KURT RASMUSSEN	Progress: 75-100% Complete	Needs final report.

### Project Status Detail

Answer Set: DEFAULT

Question	Answer
1. Number of Sample Sites (Enter the station IDs if you know them).	TP and Chl a samples and vertical dissolved oxygen and temperature profiles will be collected on three occasions at one site on Lake Neshonoc.
2. Number of Sample Events (Indicate how many trips into the field you anticipate for this project).	There will be three sampling events resulting in three trips into the field.
3. Proposed Dates for Sample Collection	Samples and profile data will be collected during the 2012 field season following the protocol Samples and profile data will be collected on three occasions during the 2012 field season following the WisCALM protocol for lake impairment assessment (TP and Chl a sampling protocol). Sampling data will be uploaded into SWIMS by the SLOH.
4. List applicable databases and who will enter data?	
5. Did you receive competitive projects funding in the previous year?	No
6. If yes to question 5, did you complete the projects including data entry and reports as necessary? If not, why not?	
7. Reviewer Notes: Identify questions or issues with project (use during review period)
